SKILLS

Technical Skills: Context API, Redux, Postman, Netlify, GitHub, Git, RESTful APIs, MongoDB, Express.js, Node.js, Responsive Web Design, Tailwind CSS, React, JavaScript(ES6+), CSS3, HTML5
Soft Skills: Problem Solving, Time Management, Effective Communication, Teamwork

PROJECTS

The Yum Voice App | *React.js, Tailwind CSS*

-  Deployed Link : <https://yum-voice.vercel.app>
-  Github Repo : <https://github.com/Biman721443/YumVoice>
- Developed a responsive web application for searching food items using Google Voice Assistant integration
- Implemented user authentication and login functionality to enhance security
- Designed an intuitive and visually appealing user interface with React.js and Tailwind CSS
- Displayed top five food results from restaurants based on user queries

Infinite Scrolling | *JavaScript, HTML, Css, Responsive Web Design*

-  Deployed Link : <https://infinitescrollingofdogimage.netlify.app/>
-  Github Repo : <https://github.com/Roshankumar056/Infinte-Scrolling/tree/main/dog%20Project>
- Developed a responsive web page with infinite scrolling to load new content seamlessly.
- Implemented a clean and user-friendly interface using HTML, CSS, and JavaScript.
- Ensured the website adapts smoothly to different screen sizes for optimal viewing.
- Focused on delivering a positive user experience by maintaining good UI design practices.

The Scheduling App | *HTML5, CSS, Responsive Web Design, JavaScript, Git*

-  Deployed Link : <https://schedpro.netlify.app/>
-  Github Repo : <https://github.com/WANI-SHAFIQ/scheduling-app>
- Developed a web application that allows admins to set availability and users to schedule meetings accordingly.
- Created a user-friendly interface and responsive design for seamless access across devices using HTML5 and CSS.
- Implemented an admin dashboard to manage scheduling and availability efficiently.
- Utilized JavaScript for interactive features and Git for version control during development.
